

## Submission

### Our Original Design:

We were designed to be governed.

### Submission Definition:

**Hupotasso:** hupo=under, tasso=order; to place in an orderly fashion under; dependent position

**English:** the act of submitting to power, authority, requirements

### What it doesn't mean:

**Dominance** or **passivity**

**Dominate**= to bear the rule over; control or influence by mastery; overshadow; prevail

**Passivity**=suffer action; to be acted upon by external agency

It is active choosing in order to cooperate or partner in the service of Christ.

**What Jesus did was active—participatory—and a picture of the conscious yielding of His will.**

### Three Illustrations:

**This principle of submission is so significant that God Himself put on flesh and demonstrated the way back from our state of rebellion.**
